5/11/54 11/12/53, 14/12/53 Collection No. 50 A.C.T.

Labs 56914 30/12/53 Var. Mem. 56917. back rd to Cuman. Goniaea sp., Dedalus australis.

56921. Left hand side of road. Junction of bitumen Praxibulus duplex, Brachyexarna lobipennis, metal roads. Collecting on lower slope of hill. Austroicetes crucíata, A. frater

Cleared savannah woodland with occas. E. melliodora Base of hill heavily grassed. Eroded stony area occurring on the slope. 3 Aust. spp. taken from here. Area rocky with patchwork pattern of bare ground to vegetation. Stipa spp. Poa spp plantago spp, dandelion spp.

56922. Right hand of road low rise, cleared Austroicetes pusilla except for occas E. blakelyi. Pasture short with small bare areas present. Pasture composed of Stipa, Enneapogan, dandelion spp. Numerous Aust. spp. nymphs?

returned for lunch.

56943 = 56922

56946 Queanbeyan

56949 Left hand side of road. Cleared Praxibulus duplex Brachyexarna lobipennis, Perunga ochracea, Austroicetes country undulating well grassed except for crucíata, A. wilgaïs low vegetation areas along the bank of an eroded gully at foot of the slope. Aust. spp

from this habitat. Stipa spp. Enneapogan, Poa spp.

ca. 56950·5 ? Turned right. Cooma – Canberra rd. approx 1 mile from 56949.

56953 – Turned left.

56956 – right hand side. Sloping country with short dry pasture predominant by barley grass, with odd clumps of spear thistle. Odd tree of E. blakelyi. Some small patches of bare ground

Praxibulus duplex, Phaulacridium, Austroicetes pusilla, Chortoicetes terminifera, Brachyexarna lobipennis, Austroicetes cruciata

---

This road leads out at La Perouse St. Manuka.

Survey 14/12/53. Labs at 56965.

Entrance to Dickson 56969·0. Main highway to Sydney.

56973 left hand side of road. Cleared hill except for scattered trees. E. melliodora, E. maculosa? Hill stony (flakes) with eroded gully. Pasture is patchy with low vegetation cover along banks of eroded wash.

Conocephalus sp., Praxibulus duplex, Brachyexarna lobipennis, Austroicetes

Plant spp. mainly Enneapogan, Stipa (scabrescens + small spp) Poa spp.

A stock route approx 1ch wide runs between the paddock fence and road, its stony with very short pasture. A. frater, Goneas taken here. 2. A frater and Praxcibulus s/ph taken in paddock areas.

56976. Right hand side of road. Low cleared rise with a patchwork pattern of bare ground to vegetation mainly short, Enneapogan, Stipa s/ph: odd clumps of Poas. Scattered throughout clumps of large Stipa s/p. (erubescens) some Aristida and small herb plant (perennial - large buds). Numerous nymphs of Aust s/ph - Gastramargus s/p.

56978. Turned right to Queanbeyan

56983. left hand side of road. Cleared area except for odd trees of E. melliodora and E. blakelyi. Pasture heavily grazed. Enneapogan dominant - almost only species present. Several water washes evident but a high % bare ground to vegetation exists over the whole area. Nymphs and adults of A frater and fusilla very numerous. No cruciata seen. Ideal Aust. habitat. Area pebbly.

right-hand side of road
56985 Semi-cleared area with E. macrorrhyncha
Odontolus australis, Praxibulus duplex,
and E. blakelyi. Specimen taken from a flat
Brachyxarma lobipennis, Chotoicetes
area lightly vegetated with patches of pebbly
terminifera, Austrotettix crudiata, A. vulgaris, FA.
scald evident. Pasture relative short, but with
frater, A. pusilla
a strip of tall thick ~~vege~~ vegetation comprising mainly
giant Stipa (exilescens) on a marshy area. ♀s
of A crudiata taken but no males. Aust pusilla
and frater present.

56988. Bridge & creek stopped to look
for Tettrigids — none.

56989 turned off to right. back road to Canberra.

56990 — Brachyxarma lobipennis,
cleared area on a slope of a low
Chotoicetes terminifera, Austrotettix pusilla
hill. E blakelyi scattered on the crest of the
rise. Pasture short but dense with only an
occasional bare pebbly area. Pasture Enneapogon
and scattered Stipa tufts. Vulpia (bromoides)
dry and in patches. A herb about present
in isolated clumps.

56996 War memorial.

56999 Labs.

30/12/53 Canberra - Queanbeyan Rd. via Aerodrome.
War Memorial 57228·5.
Stop 57233. Junct. bitumen + metal road.
Right hand side of road. Stand of E. blakelyi +
melliodora. pasture short - dry. (1 Cryptobothrus ♂)
sight record. — Brachycrama, Praxibulus, Phaul.
Oedalius, Macrotona.
Turned back at 57233 returning to War
Memorial.
Stop 57236 Left hand side of road.
Savannah woodland type - E. blakelyi, melliodora
with numerous young saplings. Pasture
mainly dry. Enneapogan green higher up slope
No cryptobothrus. - sight record Praxibulus,
Macrotona sp. and Goneae. Acridids very sparse.

War Memorial 57237

5/1/54. Yass. Rd - Federal Highway. Junction at 16797.
Proceeded towards Yass along main road.
Turned left at signpost — Weetangera 16802
Oedaleus australis, Praxibulus
16804 Left hand side - Partly cleared
duplex, Praulacridium wiltshirense, Brachyexarna
slope. C. blakelyi, macrorrhyncha and
Calipennis, Chortoicetes terminifera,
polyanthemos. Dry pasture, Agropyron sp.
Austroicetes sulcatus
Enneapogon, and Stipa spp. Cover thick
and fairly uniform. Sight record - Gastrimar.
Population Ch. terminifera high. as well as
Brachyexarna and Praxibulus spp

16808 Sight record Ch. terminifera. Aust. pusilla.
High wind, unable to catch any specimens
Undulating cleared country with dry
dense pasture. Large Stipa, spp. Themeda
australis, Sporobulus, and Enneapogon.

16813 Weetangera.
16813.9 Turn off to Copping X. engine return.
Canberra 16826. - left for Yass. 16828.5 = 16797
16833.6 = 16802. Hall 16835.

16829 Little Beddulluck Ck Left hand side
Praxibulus duplex, Phaulacridium vittatum, Perunga
mosaic pattern of pasture short dry areas
ochracea, Chortoicetes terminifera, Austroicetes
alternating with patches of green Themida
pusilla
australis. Some E. blakelyi saplings and
an occas. Acacia. Ch. terminifera. Possibly
sight record of Austroicetes. High density of
Praxibulus, Brachyexarna, Phaulacridium.
Numerous Tettigoneidae.

16846 Left hand side — short dry
Ozdaleus australis, Gastrimargus musicus, Praxibulus duplex, Perunga
pasture on a relatively cleared area.
ochracea, Brachyexarna lobipennis,
Mainly Ennea pogon with some Themida.
Chortoicetes terminifera, Austroicetes cruciata,
High populations of Praxibulus, Brachyexarna,
A. pusilla
a Phaulacridium, again some Tettigoneidae.

Gastrimargus musicus, Praxibulus
16856. Undulating Tree less area — left hand
duplex, Phaulacridium vittatum, Brachyexarna
side. Heavy dense pasture of Ennea pogon
lobipennis, Chortoicetes terminifera; Austroicetes
with some isolated clumps of Themida.
pusilla
Numerous Ch. terminifera suggestive of
swarm remnants.

16856 Turned round back to Canberra.

16864. Right hand side — cleared area

with E. blakelyi bordering road. Short
Gastrimargus musicus, Praxibulus duplex
pasture Enneapogon and Sporobolus with
Phaulacridium vittatum, Perunga ochracea,
odd tufts of Juncus. High pop. of Brachyexarna
Brachyexarna lobipennis, Chortoicetes terminifera
Praxibulus.

Junction Yass - Federal Rd Canberra 16886
